

SUDARSHAN ANAND

AI/ML Researcher, Data Scientist

Atlanta, GA (willing to relocate) | sanand315@gatech.edu | +1 (404) 453 5664 | LinkedIn: [linkedin.com/in/sanand315/](https://www.linkedin.com/in/sanand315/)
EDUCATION

Georgia Institute of Technology Atlanta, GA, United States
MS Computational Science and Engineering (CGPA: 4.0/4.0) Aug 2024 – May 2026
Relevant Coursework: Data Science for Epidemiology, Machine Learning for Graphs, Industrial Math, Numerical Linear Algebra
Birla Institute of Technology and Science (BITS Pilani) Pilani, Rajasthan, India
MSc. Mathematics and B.E. Computer Science (CGPA: 9.4/10) Aug 2019 – Aug 2024

AI & DATA SCIENCE RESEARCH PROJECTS

Multimodal Progression Tracking of Neurodegenerative disorders Aug 2025 – present
Georgia Institute of Technology Atlanta, GA, United States

- Building an **interpretable AI framework** for **progression tracking of Alzheimer's and Parkinson's** disease with the help of imaging data (MRI, CT scans) and clinical data (clinical notes, diagnosis tests, etc.)

Enterprise Knowledge Search Jun 2025 – Aug 2025
Rezolve.ai Dublin, CA, United States [Remote]

- Co-developed an **Agentic AI-powered knowledge search platform** enabling employees to retrieve information with speed and precision
- Ensured AI trust and oversight** by implementing explainability principles and Human-in-the-Loop governance.
- Presented the solution to potential clients and leading market research firms, earning strong positive feedback and interest

EpiCoV Metadata Analysis May 2025 – present
Edith Cowan University Western Australia, Australia [Remote]

- Driving **equitable data access and strategic public health policy** through ongoing analysis of COVID-19 patient de-identified data and genomic data, identifying critical metadata gaps and informing new data-sharing protocols
- Invited to present “Metadata makes Big Data useful for AI/ML-ready, equitable pandemic response” at the IEEE-EMBS International Conference on Biomedical and Health Informatics (BHI'25)

Samay: Time-series Foundational Models Library Jan 2025 – May 2025
Georgia Institute of Technology Atlanta, GA, United States

- Co-developed [Samay](#), an **open-source python library** to train and evaluate time-series foundational models
- Finetuned MOIRAI and other SOTA Time-series foundational models
- Benchmarked zero-shot and finetuned models for time-series forecasting on [GiftEval](#) benchmark

EXPERIENCE

AI Product Development Intern Jun 2025 – Aug 2025
Rezolve.ai Dublin, CA, United States [Remote]

- Collaborated across teams in developing multiple Agentic AI products in the domain of employee support
- Implemented human-in-the-loop and model-reasoning workflows to ensure transparency and responsible AI practices
- Generated strong interest from potential clients and leading market research firms for both products, demonstrating market viability and adoption potential

AI Scientist Intern Jan 2024 – Jun 2024
Qure.ai Technologies Pvt. Ltd. Bangalore, Karnataka, India

- Optimized the company's lung nodule detection product against radiologist annotations, improving AI correlation by ~45% and enhancing clinical reliability
- Benchmarked image registration speed for lung nodule tracking in consecutive scans

HONORS & AWARDS

IEEE BHI 2025 Young Professional NextGen Scholar (NSF, EMBS, Google Sponsored) Sep 2025

- Secured a prestigious research scholarship award sponsored by the NSF, IEEE EMBS and Google, for high-impact work in Biomedical AI, resulting in an invitation to present at the IEEE-EMBS International Conference on Biomedical and Health Informatics (BHI'25)

LEADERSHIP ROLES

Graduate Teaching Assistant Aug 2025 – present
Georgia Institute of Technology (CSE Algorithms) Atlanta, GA, United States

- Facilitate effective communication between professor and 180 students by resolving logistical queries promptly
- Foster conceptual mastery by breaking down complex topics and clarifying technical doubts
- Enhance learning outcomes by delivering precise, actionable feedback on assignments and projects

Project Lead Aug 2025 – present
Georgia Institute of Technology Atlanta, GA, United States

- Leading the research and development of a Responsible AI framework for chest X-ray disease classification
- Mentoring 6 research collaborators on research methodology and tracking weekly progress

SKILLS

Machine Learning & Math: Data Science, Deep Learning, Foundational Models, Predictive modeling, Network science.

Software: Pytorch, Lightning, Pinecone, MONAI, PostgreSQL, Neo4j, MongoDB, PowerBI, Alteryx

Soft skills: Leadership, Communication, Report writing
