

SUDARSHAN ANAND ([personal website](#))

AI/ML Researcher, Data Scientist

Atlanta, GA (willing to relocate) | asudarshan14@gmail.com | +1 (404) 453 5664 | LinkedIn: [linkedin.com/in/sanand315/](https://www.linkedin.com/in/sanand315/) | F1 VISA

EDUCATION

Georgia Institute of Technology	Atlanta, GA, United States
MS Computational Science and Engineering (CGPA: 4.0/4.0)	Aug 2024 – May 2026
Birla Institute of Technology and Science (BITS Pilani)	Pilani, Rajasthan, India
MSc. Mathematics and B.E. Computer Science (CGPA: 9.4/10)	Aug 2019 – Aug 2024

AI & DATA SCIENCE RESEARCH PROJECTS

Multimodal Progression Tracking of Neurodegenerative disorders	Aug 2025 – present
Building an interpretable AI framework for progression tracking of Alzheimer's and Parkinson's disease with the help of imaging data (MRI, CT scans) and clinical data (clinical notes, diagnosis tests, etc.)	
Enterprise Knowledge Search	Jun 2025 – Aug 2025
- Developed Agentic AI search platform (SearchIQ), reducing query time to <20 seconds while ensuring scalability. - Enforced AI trust and compliance by embedding Explainability (XAI) and Human-in-the-Loop (HITL) mechanisms into the deployment pipeline.	
EpiCoV Metadata Analysis	May 2025 – present
- Leading the retrospective study on COVID-19 genomic data to bridge metadata gaps and establish equitable data-sharing protocols. - Fine-tuned Gemma and MedGemma (using SFT) to automate patient status annotation for 1.2M sequences in the GISAID database. - Presented findings on metadata quality at the IEEE-EMBS BHI 2025 conference (abstract)	
Samay: Time-series Foundational Models Library	Jan 2025 – May 2025
- Developed Samay, an open-source python library to train and evaluate time-series foundational models - Finetuned MOIRAI and other SOTA Time-series foundational models - Benchmarked zero-shot and finetuned models for time-series forecasting on GiftEval benchmark	

EXPERIENCE

Resolve.ai - AI Product Development Intern	Jun 2025 – Aug 2025
- Collaborated across teams in developing multiple Agentic AI products in the domain of employee support - Implemented human-in-the-loop and model-reasoning workflows to ensure transparency and responsible AI practices - Generated strong interest from potential clients and leading market research firms for both products, demonstrating market viability and adoption potential	
Qure.ai Technologies Pvt. Ltd. - AI Scientist Intern	Jan 2024 – Jun 2024
Optimized company's lung nodule detection product against radiologist annotations, improving AI correlation by ~45% and enhancing clinical reliability. Benchmarked image registration speed for lung nodule tracking in consecutive scans	

HONORS & AWARDS

IEEE BHI 2025 Data Challenge Competition Champion	Oct 2025
Led the study design and development of AI/ML-driven depression risk prediction, winning the IEEE-sponsored competition (backed by NSF & Google).	
IEEE BHI 2025 Young Professional NextGen Scholar (NSF, EMBS, Google Sponsored)	Sep 2025
Awarded prestigious NSF/Google-sponsored scholarship for high-impact Biomedical AI research, including an invitation to present at the IEEE BHI 2025 conference	

LEADERSHIP ROLES

Project Lead	Aug 2025 – present
Georgia Institute of Technology	Atlanta, GA, USA
Spearheading a 10-person research team in the development of a Responsible AI framework for chest X-ray classification, guiding research methodology and weekly milestones. Evaluating uncertainty quantification techniques to enhance the transparency and clinical relevance of chronic lung ailment diagnoses.	

SKILLS

ML & Math: LLM Fine-tuning (SFT, DPO, PPO, RL), Transformer Architecture, Multimodal AI & Foundational Models, Multi-task classification, Predictive Modeling, Statistics, & Network Science

Software: PyTorch, Cloud Platforms (GCP & AWS SageMaker), GCS Storage, HPC Clusters & Slurm Array Jobs, PostgreSQL, MongoDB, Pinecone, Neo4j, PowerBI

Soft skills: Communication, Leadership/Team management, Technical Report writing
