

SUDARSHAN ANAND

AI/ML Researcher, Data Scientist

Atlanta, GA (willing to relocate) | sanand315@gatech.edu | +1 (404) 453 5664 | LinkedIn: [linkedin.com/in/sanand315/](https://www.linkedin.com/in/sanand315/) | **F1 VISA**

EDUCATION

Georgia Institute of Technology <i>MS Computational Science and Engineering (CGPA: 4.0/4.0)</i> Relevant Coursework: Data Science for Epidemiology, Machine Learning for Graphs, Industrial Math, Numerical Linear Algebra	Atlanta, GA, United States Aug 2024 – May 2026
Birla Institute of Technology and Science (BITS Pilani) <i>MSc. Mathematics and B.E. Computer Science (CGPA: 9.4/10)</i>	Pilani, Rajasthan, India Aug 2019 – Aug 2024

AI & DATA SCIENCE RESEARCH PROJECTS

Multimodal Progression Tracking of Neurodegenerative disorders <i>Georgia Institute of Technology</i>	Aug 2025 – present Atlanta, GA, United States
Building an interpretable AI framework for progression tracking of Alzheimer's and Parkinson's disease with the help of imaging data (MRI, CT scans) and clinical data (clinical notes, diagnosis tests, etc.)	
Enterprise Knowledge Search <i>Rezolve.ai</i>	Jun 2025 – Aug 2025 Dublin, CA, United States [Remote]
- Co-led the end-to-end development of an Agentic AI knowledge search platform, enabling employees to retrieve mission-critical information with precision and reducing search time to under 20 seconds. - Architected the solution to meet stringent functional and non-functional requirements, ensuring a robust and scalable enterprise product pipeline. - Secured AI Trust and Oversight by implementing Explainability (XAI) principles and Human-in-the-Loop (HITL) governance standards throughout the deployment process.	
Samay: Time-series Foundational Models Library <i>Georgia Institute of Technology</i>	Jan 2025 – May 2025 Atlanta, GA, United States
- Co-developed Samay, an open-source python library to train and evaluate time-series foundational models - Finetuned MOIRAI and other SOTA Time-series foundational models - Benchmarked zero-shot and finetuned models for time-series forecasting on GiftEval benchmark	

EXPERIENCE

AI Product Development Intern <i>Rezolve.ai</i>	Jun 2025 – Aug 2025 Dublin, CA, United States [Remote]
- Collaborated across teams in developing multiple Agentic AI products in the domain of employee support - Implemented human-in-the-loop and model-reasoning workflows to ensure transparency and responsible AI practices - Generated strong interest from potential clients and leading market research firms for both products, demonstrating market viability and adoption potential	
AI Scientist Intern <i>Qure.ai Technologies Pvt. Ltd.</i>	Jan 2024 – Jun 2024 Bangalore, Karnataka, India
- Optimized the company's lung nodule detection product against radiologist annotations, improving AI correlation by ~45% and enhancing clinical reliability - Benchmarked image registration speed for lung nodule tracking in consecutive scans	

HONORS & AWARDS

IEEE BHI 2025 Data Challenge Competition Champion	Oct 2025
Winner of the Data Challenge conducted by IEEE and Sponsors of BHI conference (Google, NSF, etc), which involved applying AI/ML methods to understand depression risk through demographics, clinical factors & mindfulness interventions	
IEEE BHI 2025 Young Professional NextGen Scholar (NSF, EMBS, Google Sponsored)	Sep 2025
Secured a prestigious research scholarship award sponsored by the NSF, IEEE EMBS and Google, for high-impact work in Biomedical AI, resulting in an invitation to present at the IEEE-EMBS International Conference on Biomedical and Health Informatics (BHI'25)	

LEADERSHIP ROLES

Graduate Teaching Assistant <i>Georgia Institute of Technology (CSE Algorithms)</i>	Aug 2025 – present Atlanta, GA, United States
- Facilitate effective communication between professor and 180 students by resolving logistical queries promptly - Foster conceptual mastery by breaking down complex topics and clarifying technical doubts - Enhance learning outcomes by delivering precise, actionable feedback on assignments and projects	

SKILLS

Machine Learning & Math: Data Science, Deep Learning, Foundational Models, Predictive modeling, Network science.

Software: Pytorch, Lightning, Pinecone, MONAI, PostgreSQL, Neo4j, MongoDB, PowerBI, Alteryx

Soft skills: Leadership, Communication, Report writing
